OBJECTIVE

Computer Science graduate with strong foundations in software development, data structures, and cloud computing.Seeking a Software Developer role to contribute to scalable, high-impact solutions in a dynamic and growth-oriented environment.

EDUCATION

Bachelor of Technology- Computer Science and Business Systems (CGPA:9.2) 2021 - 2025
Sree Vidyanikethan Engineering College, Andhra Pradesh

SKILLS

Programming and web	: Python,Java,HTML5,CSS3
Databases	: MySQL, SQL
Cloud and DevOps	: AWS,Docker,Kubernetes
Enterprise Systems	: SAP(knowledge of ERP concepts and SAP modules)
Core Concepts	: OOP,Data Structures

EXPERIENCE

Salesforce Developer Virtual Intern May 2023 - July 2023
Salesforce *Remote*

- Learned and applied Salesforce fundamentals to create and manage workflows for automating repetitive business processes.
- Gained exposure to customizing Salesforce objects, fields, and validation rules to meet project requirements.

AICTE Cloud Virtual Intern Apr 2024 - June 2024
AICTE *Remote*

- Worked on designing and deploying small-scale applications on a cloud platform, learning about scalability and performance.
- Learned basic principles of cloud infrastructure, including resource management, service deployment, and monitoring.

PROJECTS

Smart Crop Recommendation System
Developed a machine learning model in Python using algorithms such as SVM, Random Forest, and others to recommend optimal crops based on climatic and soil conditions.Performed data preprocessing and analysis to enhance model accuracy and reliability, achieving 99% prediction accuracy.

Mela - The College Event Website
Developed a user-friendly web application for event management, focusing on usability, speed, and security using HTML, CSS, JavaScript, PHP, and SQL. Implemented authentication and real-time updates; improved user experience by 40%.

CERTIFICATIONS

- Python Essentials – Cisco Networking Academy
- .Net fundamentals Certification – GreatLearning
- SQL Bootcamp – Udemy
